

8) Write a HTML code that takes name(fname and lname), contact number, email, age and blood group as input and display the entered details using \$_GET array.

get.html

```
<html>
<body>
<h3> GET METHOD </h3>
<form action ="get.php" method ="GET">
FIRST NAME: <input type ="text" name="fname"/></br><br>
LAST NAME: <input type="text" name="lname"/><br><br>
MOBILE NO: <input type="text" name="num"/><br><br>
EMAIL: <input type="text" name="mail"/><br><br>
AGE: <input type="text" name="age"/><br><br>
BLOOD GROUP: <input type="text" name="bloodgroup"/><br><br>
<input type = "SUBMIT" />
</form>
</body>
</html>
```

get.php

```
<html>
<body>
Welcome <?php echo $_GET["fname"];?>
<?php echo " ".$_GET["lname"];?>
</br>
Your Phone Number: <?php echo $_GET["num"];?>
</br>
Your E-mail is: <?php echo $_GET["mail"];?>
```

</br>

Your Age is: <?php echo \$_GET["age"];?>

</br>

Your Blood group is : <?php echo \$_GET["bloodgroup"];?>

</br>

</body>

</html>

OUTPUT:

GET METHOD

FIRST NAME:

LAST NAME:

MOBILE NO:

EMAIL:

AGE:

BLOOD GROUP:

```
Welcome  
Your Phone Number: Rashmitha S K  
Your E-mail is:4nm20is115@nmamit.in  
Your Age is:20  
Your Blood group is :A+
```

9) Write a HTML code that takes name(fname and lname), contact number, email, age and blood group as input and display the entered details using \$_POST array.

post.html

```
<html>  
<body>  
<h3> POST METHOD </h3>  
<form action ="post.php" method ="POST">  
FIRST NAME: <input type ="text" name="fname"/></br><br>  
LAST NAME: <input type="text" name="lname"/><br><br>  
MOBILE NO: <input type="text" name="num"/><br><br>  
EMAIL: <input type="text" name="mail"/><br><br>  
AGE: <input type="text" name="age"/><br><br>  
BLOOD GROUP: <input type="text" name="bloodgroup"/><br><br>  
<input type = "SUBMIT" />  
</form>
```

```
</body>
```

```
</html>
```

post.php

```
<html>
```

```
<body>
```

```
Welcome <?php echo $_POST["fname"];?>
```

```
<?php echo " ".$_POST["lname"];?>
```

```
</br>
```

```
Your Phone Number: <?php echo $_POST["num"];?>
```

```
</br>
```

```
Your E-mail is: <?php echo $_POST["mail"];?>
```

```
</br>
```

```
Your Age is: <?php echo $_POST["age"];?>
```

```
</br>
```

```
Your Blood group is : <?php echo $_POST["bloodgroup"];?>
```

```
</br>
```

```
</body>
```

```
</html>
```

OUTPUT:

POST METHOD

FIRST NAME:

LAST NAME:

MOBILE NO:

EMAIL:

AGE:

BLOOD GROUP:

Welcome

Your Phone Number: Rashmitha S K

Your E-mail is:4nm20is115@nmamit.in

Your Age is:20

Your Blood group is :A+

10) Write a PHP script that accepts filename, extension, text content and writes into file.

<html>

```
<body>
<form method="post">
Enter the filename <input type="text" name="file"><br><br>
Enter the extension <br><br>
<select name = "ext">
<option value ="txt">txt</option>
<option value ="docx">docx</option>
<option value ="pdf">pdf</option>
<option value ="doc">doc</option>
<option value ="odt">odt</option>
</select>
<br><br>
Enter the text <br><br>
<textarea name="cont"></textarea><br>
<input type="submit" value="submit" name="submit">
</body>
</html>
<br><br>
<?php
if(isset($_POST["submit"]))
{
$fname=$_POST['file'];
$ext=$_POST['ext'];
$cont=$_POST['cont'];
file_put_contents($fname." ".$ext,$cont) or die("unable to open");
}
?>
```

OUTPUT:

A screenshot of a web form with a light gray border. It contains three input fields and a submit button. The first field is labeled 'Enter the filename' and contains the text 'text'. The second field is labeled 'Enter the extension' and is a dropdown menu showing 'txt'. The third field is labeled 'Enter the text' and contains the text 'This is my first file'. Below the text field is a 'submit' button.

Enter the filename

Enter the extension

Enter the text

AFTER SUBMIT
